

White Corundum Excircle Grinding Wheel

This white corundum grinding wheel is designed for excircle grinding applications. It offers efficient material removal and fine surface finishes on various materials.

Product Overview

High-Precision Grinding Performance

This white corundum excircle grinding wheel is engineered for high-precision grinding applications requiring superior surface finish. Its advanced abrasive composition ensures efficient material removal while maintaining minimal heat generation to protect workpiece integrity. It serves as an ideal solution for precision grinding machines and professional tool sharpening tasks.

Technical Specifications

Application	Excircle Grinding
Abrasive Material	White Corundum

Features

Key Advantages	Minimal heat generation, High precision, Long-lasting performance, Fine surface finish
----------------	--

Compatibility

Suitable Applications

- Excircle grinding
- Precision machine grinding
- Tool sharpening
