

# White Wine Bottle Mold

This two-part mold is designed for creating white wine bottles. It is constructed from durable materials to ensure precise dimensions and smooth surfaces.

## Product Overview

### Precision White Wine Bottle Mold

This two-part mold is specifically engineered for the professional manufacturing of white wine bottles. It features a precision-crafted cavity designed to form the bottle's body, neck, and base with high accuracy. The durable construction ensures consistent dimensions and smooth surface finishes, while the intuitive design allows for easy assembly and disassembly to streamline your production workflow.

## Technical Specifications

### Key Design Features

- Integrated body cavity
- Precision-formed neck section
- Defined base structure
- Easy assembly/disassembly mechanism

### Construction

Durable Material • Smooth Surface Finish

### Mold Configuration

Two-part mold

### Intended Use

Glassblowing, Bottle Manufacturing
