

Whole House Sediment Filter

This whole house sediment filter removes sediment, dirt, rust, and other particulate matter from your entire home's water supply. It features a clear housing that allows you to easily monitor the filter's condition and a durable construction for long-lasting performance.

Product Overview

Whole House Sediment Filtration

This whole house sediment filter is engineered to protect your home's plumbing system by effectively removing sediment, dirt, rust, and other particulate matter from the main water supply. Designed for durability and ease of use, it features a clear housing that allows for quick visual inspections of filter life. It is an essential solution for ensuring cleaner water for all household needs, including drinking, bathing, and laundry.

Technical Features

Maintenance

Easy Installation • Low Maintenance

Filtration Targets

Sediment, Dirt, Rust, Particulate Matter

Housing Design

Clear housing for visual monitoring

Application

Suitable Applications

- Drinking water
- Bathing
- Laundry
- Whole house plumbing protection
