

Whole-House Water Purification Cartridge

This water purification cartridge is designed for whole-house filtration applications. It utilizes advanced filtration media to remove sediment, chlorine, and other contaminants.

Product Overview

System Overview

This high-capacity water purification system is engineered for whole-house filtration, ensuring a consistent supply of clean and safe water throughout your residential or commercial property. The unit utilizes advanced filtration media to effectively reduce sediment, chlorine, and various impurities from your water source. Encased in durable stainless steel, it is designed for longevity and reliable performance in demanding environments.

Performance Metrics

Filtration Targets

Sediment, Chlorine, General Contaminants

Construction & Design

Housing Material

Stainless Steel

Applications

Suitable Applications

- Residential Households
- Commercial Properties
