

# Wi-Fi Door and Window Contact Sensor with Alarm

This Wi-Fi contact sensor can be installed on doors or windows. When triggered, it emits a >100dB alarm and sends notifications via a compatible smartphone application.

## Product Overview

### Smart Wi-Fi Security Solution

This advanced door and window contact sensor provides real-time security monitoring for your premises. Featuring a built-in Wi-Fi module, the device allows for standalone operation without the need for a separate hub, enabling seamless mobile notifications. With an integrated keypad for programmable 4-digit code entry and a high-decibel alarm, it offers both localized deterrence and remote awareness.

## Technical Specifications

### Alarm Volume

**100 dB**

Sound Output

### Keypad Security

- Programmable 4-digit security code
- Manual arm/disarm keypad
- Real-time mobile push notifications
- Instant open/close status detection

### Connectivity

Wi-Fi, App-Based

### Model Identifier

RL-WD02
