

Wi-Fi RF Smart Switch for Home Automation

This Wi-Fi/RF smart switch is designed for smart home automation, supporting MQTT and COAP protocols. It allows for remote control and automation of electrical devices through wireless connectivity.

Overview

Smart Home Automation Control

This Wi-Fi and RF enabled smart switch provides a robust solution for remote electrical device management. Designed for home automation, it supports modern communication protocols including MQTT and COAP for seamless integration into connected ecosystems. Its compact flame-retardant housing ensures safe operation across a variety of residential environments.

Electrical Specifications

Maximum Load

10 A

Rated Load Capacity

Input Voltage Range 90-250V AC

Power Frequency 50/60 Hz

Connectivity

Wi-Fi Standard IEEE 802.11 b/g/n

RF Operation Frequency 433.92 MHz

Protocols MQTT, COAP, Wi-Fi, RF

Physical & Environmental

Housing Material Flame retardant PC

Operating Temperature 0°C to 40°C

Compliance

Certifications

CE • RoHS • FC
