Product Overview

Integrated Security Solution

This comprehensive Wi-Fi security system combines high-definition video surveillance with advanced motion and perimeter sensing to protect your premises. Designed for both residential and business applications, it provides real-time monitoring via a dedicated smartphone app. The inclusion of an SOS emergency wristband and dual-way intercom capabilities ensures that users can manage security events and request assistance instantly from anywhere.

Technical Specifications

Video Resolution	960P HD
Connectivity	Wi-Fi, RF
Maximum Storage	128 GB
Storage Type	TF Card (Optional)

System Features

Key Functionalities

- Full duplex real-time intercom
- Motion-sensing technology
- Anti-theft alarm system
- App-based remote management
- Dual-way intercom answering

System Components

Included Hardware

IP Camera • Motion Sensor • Door/Window Sensor • SOS Wristband

Wireless Coverage

100 m

Open Area Range
