

Wi-Fi Smart Power Strip with USB Charging Ports

This Wi-Fi smart power strip features multiple AC outlets and USB ports for device charging. It allows users to remotely manage power usage and charging through a smartphone application.

Overview

Smart Power Management Solution

This Wi-Fi smart power strip is designed to modernize home and office environments with intelligent power distribution. It features three individually controlled smart outlets and one always-on socket, complemented by three USB charging ports for versatile device connectivity. Fully integrated with Tuya technology, it enables remote power control and seamless voice command support through Amazon Alexa and Google Assistant.
