Product Overview

Industrial Performance

This heavy-duty wide belt sander is engineered for high-volume wood processing, solid wood, and composite materials. Featuring a sophisticated double-belt configuration, it offers efficient stock removal combined with precision fine finishing. The unit is built for durability in demanding production environments, integrating advanced dust collection and digital controls for consistent operational quality.

Technical Specifications

Compatible Materials

- Solid wood
- Veneer
- Composite materials

Model ID

SH2213(R-RP)

Sanding Configuration

Double-belt, R-RP

Control & Electrical

Control System

- Digital controls
- Variable speed control
- Automated timer relays
- Integrated circuit protection

Design & Features

Key Features

High-volume capacity • Dust collection ready • Precision rollers • Heavy-duty construction
