

Wide Teeth Turbo Diamond Saw Blade

This blade delivers fast and smooth cutting with minimal chipping. It is suitable for use on brick, block, concrete, and other masonry materials, offering enhanced cooling and effective dust removal.

Overview

High-Performance Cutting Solution

This wide teeth turbo diamond saw blade is engineered for fast, smooth cutting with minimal chipping. Featuring a robust hot-pressed sintered construction, it is designed for demanding masonry applications including brick, block, and concrete. The advanced turbo design facilitates superior cooling and efficient dust removal, ensuring consistent performance and durability during operation.

Technical Specifications

Key Features

- Wide teeth configuration for enhanced speed
- Reduced vibration
- Optimal cooling system
- Efficient dust removal
- Long-lasting durability

Compatible Tools

Angle Grinders • Circular Saws

Blade Type	Hot-pressed sintered turbo blade
Compatible Materials	Brick, Block, Concrete, Masonry, Granite, Marble, Ceramic
