

WiFi Door and Window Contact Sensor

This WiFi door and window contact sensor wirelessly monitors the open or closed status of doors and windows. It connects to a WiFi network and sends alerts via a mobile app.

Product Overview

Smart Wireless Monitoring

This WiFi-enabled magnetic contact sensor provides real-time monitoring for doors and windows, delivering instant push notifications directly to your mobile device upon status changes. Designed for seamless integration into smart environments, it features a standalone WiFi module that ensures reliable connectivity without the need for additional hubs. Its one-key reset function and wire-free design make installation and daily operation straightforward for any security application.

Technical Specifications

Working Voltage

4.5 V

Working Voltage

Power Consumption

Parameter	Value
Working Current	<90mA
Standby Consumption	<30uA

Connectivity & Compatibility

Wireless Protocol	WiFi 2.4GHz
-------------------	-------------

Environment & Requirements

Operating Temperature	-10 to 50°C
Power Source	3 x AAA Batteries
