Product Overview

Smart Home Integration

This WiFi-enabled smart plug allows for convenient remote control of home appliances through a smartphone application. Designed with a compact form factor for minimal space usage, it supports scheduling, timers, and voice control integration. The plug ensures safe and efficient operation while seamlessly connecting to standard 230V electrical systems.

Technical Specifications

Key Performance Metrics

230 V Voltage	2300 W Max Power	10 A Max Current	25 m Transmission Range
-------------------------	----------------------------	----------------------------	-----------------------------------

Connectivity Standards

- 2.4GHz Frequency
- IEEE802.11b/g/n
- 18.52dBm Max Transmission Power

Operational Conditions

Environment & Safety

Feature	Specification
Protection Rating	IP20
Operating Temp	0-35 °C
Frequency	50Hz

Certifications	CE, RED Certified
