

WiFi-Enabled Wireless PIR Motion Sensor

This PIR sensor uses passive infrared technology to detect motion. It connects to a WiFi network and can be controlled remotely via a mobile app.

Product Overview

Smart WiFi Motion Detection

This wireless PIR motion sensor provides reliable security and smart automation for any environment. It utilizes a standalone WiFi module to transmit real-time alerts directly to the Tuya app when motion is detected. Designed for convenience, the unit is entirely wire-free and simple to install, featuring a built-in low voltage indicator to ensure consistent performance.

Technical Specifications

Connectivity	WiFi (2.4GHz)
Software Platform	Tuya App
Installation	Wire-free / No cabling required

Features

Device Status

Wire-Free • App-Integrated

Key Capabilities

Motion Detection, Push Notifications, WiFi Connectivity, Low Voltage Warning, Stand-alone Operation
