

WiFi Recloser Circuit Breaker

This WiFi intelligent recloser circuit breaker is suitable for 50Hz/60Hz, 230/400V circuits up to 125A. It features overload protection, short-circuit protection and isolating protection, with remote control via smartphone.

Product Overview

Smart IoT Circuit Protection

This intelligent recloser circuit breaker provides comprehensive power management, integrating electricity metering with robust protection against overloads, short circuits, and voltage fluctuations. Designed for both residential and industrial use, it offers seamless remote control via mobile applications and supports voice commands through major smart home ecosystems. The device ensures operational safety through manual and automated switching, making it an ideal solution for remote monitoring of critical infrastructure like water pumps, heating systems, and street lighting.

Electrical Specifications

Available Rated Currents

- 16A
- 20A
- 25A
- 32A
- 40A
- 50A
- 63A
- 80A
- 100A
- 125A

Short-Circuit Breaking Capacity

6 KA

Breaking Capacity

Instantaneous Trip Type

Type C

Safety & Protection

Protection Features	Overload, Short-circuit, Over-voltage, Under-voltage, Leakage, Over-temperature
Short Circuit Response Time	0.01 s

Smart Features

Communication Method	Wireless WiFi
Voice Control Compatibility	Amazon Alexa, Google Assistant, IFTTT

Standards & Compliance

Conforming Standard	GB10963.1
