Product Overview

Smart Wireless Integration Hub

The Smart Wireless WiFi Zigbee Gateway acts as a versatile central hub designed to facilitate seamless communication between diverse smart devices. By bridging WiFi and Zigbee protocols, it enables efficient remote access and control for residential and commercial automation systems. Its compact, discreet design ensures it integrates easily into any environment while providing a reliable and secure foundation for your connected ecosystem.

Connectivity

Supported Protocols	WiFi, Zigbee
Wireless Security	Yes

Technical Specifications

Application Areas

- Residential Smart Home
- Commercial Automation Systems

Compatible Devices

- Sensors
- Actuators
- Smart Appliances
- Controllers

User Interface

Mobile Application • Web Interface
