

Winch Hook Rubber Stopper

This rubber stopper cushions the winch hook, preventing damage to the fairlead and bumper during winching operations. Its design ensures a secure fit, minimizing noise and vibration while providing added safety during vehicle recovery.

Product Overview

Essential Winch Protection

This solid rubber line stopper prevents your winch hook from pulling through the roller or hawse fairlead, effectively protecting your equipment from impact damage. Designed to reduce trail rattle, it ensures a quieter ride while traversing rough terrain. Compatible with both steel and synthetic winch cables, this durable accessory is an essential addition for off-road recovery setups.

Specifications
