

Window Construction Extruded Aluminum Profile

Extruded aluminum profile designed for window construction. It features multiple internal chambers for thermal insulation and structural reinforcement.

Product Overview

Professional Window Construction Profile

This extruded aluminum profile is precision-engineered for high-performance window construction. It features a multi-chamber design that provides both enhanced thermal insulation and robust structural reinforcement. The profile is equipped with integrated channels for efficient glazing and hardware installation, ensuring a secure and weather-tight seal for professional building applications.

Technical Specifications

Material	Extruded Aluminum
Finish	Black
Application	Window Construction

Key Features

Design Elements

- Multi-chamber internal structure
- Integrated glazing channels
- Dedicated hardware installation slots

Features	Thermal Insulation, Structural Reinforcement, Corrosion Resistant, Weather-tight Seal
