

Window Mounted Evaporative Air Cooler

This evaporative air cooler is designed for window installation. It cools air through water evaporation, providing an energy-efficient alternative to air conditioning.

Product Overview

High-Efficiency Cooling Solution

This window-mounted evaporative air cooler offers a cost-effective and energy-efficient cooling solution for large residential or commercial spaces. By leveraging the natural process of water evaporation, it effectively lowers air temperatures while improving indoor air quality. Designed for easy installation, this unit features a robust, weather-resistant build suitable for continuous operation in dry climates.

Performance Metrics

Core Performance Data

18000 m³/h

Air Flow

1.1 kw

Power Input

130 m²

Max Cooling Area

Technical Specifications

Voltage/Frequency	380v/50hz
Noise Level	75 dBA

Physical Dimensions

Dimensions	1100x1100x1000mm
Weight	55 kgs
