

Window Ventilation Fan

This window ventilation fan is designed for effective air extraction and ventilation. It features a durable construction with a square frame and a circular fan housing.

Product Overview

High-Efficiency Window Ventilation

The Window Ventilator APB-B is a professional-grade ventilation solution engineered for effective air extraction in residential and commercial spaces. Its durable construction features a robust square frame paired with an optimized circular fan housing for consistent airflow performance. Designed for versatile application, it is ideal for kitchens, bathrooms, and utility rooms where humidity and air quality management are essential.

Technical Features

Design Features

- Square mounting frame
- Circular aerodynamic fan housing
- Multi-blade design for optimal airflow

Installation

Window mounted

Primary Applications

Kitchen, Bathroom, Utility Room
