

Windshield Wiper Blade with Natural Rubber

This windshield wiper blade is made with self-lubricating modified natural rubber for smooth and effective cleaning. It incorporates a flexible stainless steel flat wire for durability and consistent performance.

Product Overview

Professional Grade Windshield Wiper Blade

This premium windshield wiper blade features advanced self-lubricating modified natural rubber to ensure smooth, streak-free cleaning in diverse weather conditions. Designed with a flexible stainless steel flat wire and a specialized Pro-design frame, it offers superior structural stability and consistent contact across the entire glass surface. Engineered for universal compatibility, it serves 100% of vehicles globally and is trusted in over 140 countries.
