

Windshield Wiper DC Motor with Linkage Arm

This DC motor is designed for windshield wiper systems in automotive applications. It features a metallic housing, integrated linkage arm, and electrical connector for easy installation.

Overview

Reliable Windshield Wiper Solution

This DC motor is specifically engineered for automotive windshield wiper systems, ensuring consistent and efficient operation. Featuring a robust metallic housing and an integrated linkage arm, it is designed for durability and ease of installation. This component is an essential solution for maintaining optimal visibility in various driving conditions.

Technical Specifications

Application

Automotive • Windshield Wiper Systems

Motor Type

DC Motor

Key Features

Integrated Linkage Arm, Metallic Housing, Automotive Grade

Installation

Installation Details

- Includes integrated linkage arm for direct connection
- Features clearly visible electrical connector
- Designed for simplified mounting
