

Wine Cellar Air Conditioner Unit

Compact air conditioning unit designed for wine coolers, providing precise temperature control. Features include a durable enclosure, efficient cooling system, and adjustable settings to maintain desired humidity and temperature levels.

Product Overview

Precision Climate Control

This specialized air conditioning unit is engineered to maintain stable environmental conditions for wine storage. It provides precise temperature regulation between 10 and 20 degrees Celsius to protect the integrity of wine collections. Designed for versatility, this system is ideal for professional showrooms, hotels, and private residential wine cellars.

Performance Metrics

Cooling Capacity

1.5 kW

Model NBJG-15W

2 kW

Model NBJG-20W

2.5 kW

Model NBJG-25W

Technical Specifications

Airflow	300 m3/h
Temperature Range	10 - 20°C

Applications

Recommended Use	Hotels, Residential Wine Cellars, Showrooms
