Product Overview

Professional Wine Preservation

This wine cooler is expertly designed to provide an optimal storage environment for your collection, ensuring long-term preservation and quality. It features advanced temperature control systems and UV-resistant glass to protect against oxidation and premature aging. With vibration-minimizing wooden shelves and consistent air-cooled circulation, it maintains a stable, precise climate for every bottle.

Technical Specifications

Model Identifier	JC-76A
Bottle Capacity	22 bottles

Key Features

Cooling System

Air Cooled Technology • Consistent Temperature • Circulation Fans

Design & Build

UV-Resistant Glass, Wooden Shelves, Vibration Reduction
