

Wine Red Switch Cover

This wine red cover is designed for switches used in electric power transmission and distribution. It provides a protective and aesthetic finish to electrical switch installations.

Product Overview

Elegant wine red finish for modern electrical installations.

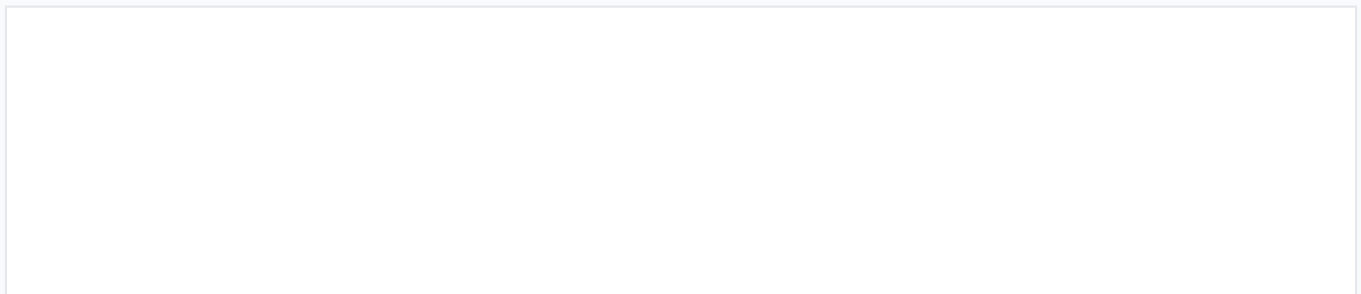

Professional Switch Cover Solutions

This premium switch cover is engineered with fire-resistant PC materials, providing both safety and durability for electrical installations. It features a robust design with an earthed metal frame and child-proof shuttered outlets, ensuring reliable performance and enhanced user safety. Designed for ease of installation, the product includes captive terminal screws and a modular architecture, making it an ideal choice for residential or commercial electrical systems.
