

Wing Nuts

Wing nuts are designed for manual tightening and loosening. Their wing-like projections provide an easy grip, making them suitable for applications needing frequent adjustments without tools.

Product Overview

Versatile Wing Nut Fasteners

These wing nuts are engineered for applications that require frequent manual adjustments without the need for specialized tools. Featuring distinct wing-like projections, they provide an ergonomic grip for quick tightening and loosening by hand. Constructed from high-quality metal with a durable silver finish, these fasteners offer reliable performance in various assembly and maintenance environments.
