

# Winged Flat Head Self-Drilling Screw

This self-drilling screw is designed with a flat head, ensuring a flush finish once installed. Its wings are engineered to ream the hole during drilling, allowing threads to engage effectively.

## Product Overview

### Winged Flat Head Self-Drilling Screw

This self-drilling screw features a specialized winged design intended to ream holes for effective thread engagement, ensuring a secure and reliable fastening process. The flat head design allows for a flush, professional finish upon installation. Engineered for efficiency, this fastener is suitable for a variety of demanding applications where precision and holding power are critical.

## Technical Specifications

Head Style	Flat Head
Fastener Type	Self-Drilling Screw with Wings

## Key Features

Key Features	Self-Drilling, Winged Design, Flush Finish
