

Wire and Cable Identification Markers

These cable markers are designed for the identification of wires and cables. They are made from durable materials resistant to abrasion, chemicals, and extreme temperatures.

Product Overview

Versatile Wire and Cable Identification Solutions

These identification markers are designed for high-efficiency wire and cable management across electrical, telecommunications, and industrial sectors. The range includes pre-printed reels for rapid deployment alongside blank markers for custom labeling requirements. Built from durable materials, these markers ensure long-lasting legibility even when exposed to chemicals, abrasion, and extreme temperature fluctuations.

Design & Application

Available Formats

Clip-on, Wrap-around, Adhesive, Pre-printed Reels, Blank Markers

Durability Standards

Resistance Features

Abrasion Resistant • Chemical Resistant • Temperature Resistant

Technical Specifications

Target Applications

- Electrical Wiring
- Telecommunications Infrastructure
- Industrial Equipment Labeling

Sample Markings

44, YY
