Product Overview

Industrial-Grade Wire Cup Brush

This robust wire cup brush is engineered for demanding surface preparation tasks, including rust removal, deburring, and cleaning. Featuring high-quality, heat-treated steel wires, it provides aggressive material removal while ensuring long-term durability. Its cup shape is optimized for efficient performance on both flat surfaces and edges, making it a versatile tool for metalworking, automotive, and construction applications.

Technical Specifications

Bristle Material	Heat-treated steel
Attachment Type	Hex nut
Compatible Tools	Standard angle grinders

Usage & Applications

Material Suitability

- Metal
- Wood

Industries

Metalworking • Automotive • Construction

Key Applications

Surface preparation, Rust removal, Deburring, Paint removal, Scale removal
