

Wire Fabric Cutter 15° - 75° Angle

This wire fabric cutter is designed for precise cutting of wire fabrics at angles ranging from 15° to 75°. It is designed for continuous operation and high-volume production.

Product Overview

Industrial Wire Fabric Cutting Solution

This specialized equipment is engineered for the processing of all steel and half-steel radial tires. It provides high-precision cutting of rolling steel wire cloth, featuring automatic continuous jointing, film laminating, and edge processing capabilities. Designed for reliability, the system utilizes advanced servo motor control to ensure strict accuracy in fixed-length feeding.

Technical Specifications

Operational Features

- Automatic continuous jointing
- Film laminating
- Edge processing
- Precision fixed-length feeding

Cutting Angle Range	15° - 75°
Feeding System	Servo Motor Control

Application

Primary Application	Radial Tire Production, Steel Wire Cloth Processing, Rubber Machinery
