

Wire Harness Terminal Assembly

This terminal assembly features multiple wires secured within a red protective sleeve. White multi-pin connectors are attached to both ends, facilitating organized connection points for various electronic devices.

Product Overview

Professional Terminal Harness Solution

This wire harness terminal assembly is designed for secure, reliable connectivity in electronic systems. The unit features multi-pin connectors on both ends, ensuring compatibility across various device integration points. Encased in a durable red protective sleeve, the wire bundle provides essential insulation and organization for complex electronic configurations.

Technical Details

Component Construction

- Multi-pin connectors on both ends
- Protective red insulation sleeve
- Multi-colored wire harness (Blue, Black, Brown)

Compliance

RoHS Compliant, Industrial Standard

Applications

Primary Applications

- Electronic component interconnection
- Device wire management
- Industrial electronics assembly
