

Wire Mesh Rolls

These wire mesh rolls are available in various sizes and materials. They are tightly wound and suitable for applications ranging from fine filtration to robust reinforcement.

Product Overview

Versatile Industrial Mesh Solutions

These professional-grade wire mesh rolls are engineered for reliability in diverse environments, ranging from heavy-duty construction to fine-scale industrial filtration. Available in various material compositions and mesh gauges, they offer exceptional durability and structural integrity. Their tightly wound configuration ensures ease of handling and storage, making them a preferred choice for contractors, fabricators, and industrial maintenance teams.

Specifications

Primary Attributes

- Corrosion-resistant coating
- Variable mesh sizing
- High-tensile strength options
- Industrial-grade winding

Material Types

Metallic, Treated Wire, Coated Wire

Applications

Common Industry Uses

Construction Reinforcement • Industrial Filtration • Hardware Fabrication • General Crafting
