

Wire Rope Electric Hoist

The wire rope electric hoist is designed for lifting and moving heavy loads in various industrial applications. It features a robust construction with high-quality materials for durability and reliable lifting operations.

Overview

CD1.MD1 Series Wire Rope Electric Hoists

The CD1.MD1 series wire rope electric hoists are engineered for lifting and moving heavy loads across diverse industrial applications. Built with high-quality, robust materials, these hoists offer exceptional durability and reliability in demanding environments. They feature an electric motor designed for smooth, precise control, complemented by a flexible, high-strength wire rope to ensure safe and efficient operations.

Key Features

Suitable Environments

- Factories
- Warehouses
- Construction Sites

Safety Features

Overload Protection, Emergency Stop

Design

Design Advantages

Compact Design • Easy Installation • Low Maintenance
