

Wire Rope Thimble

This thimble is designed for use with wire rope or cable. It provides a wear-resistant and durable loop eye, preventing abrasion and deformation of the cable.

Product Overview

Commercial Wire Rope Thimble

This commercial-grade thimble is engineered to provide a durable, wear-resistant loop eye for wire rope and cable assemblies. By preventing direct abrasion and deformation of the cable, it significantly extends the service life of your rigging equipment. Constructed from high-quality galvanized steel, this component offers excellent corrosion resistance, making it a reliable choice for various load-bearing and rigging applications.

Technical Specifications

Corrosion Resistance

Galvanized

Primary Function

- Prevents cable abrasion
- Prevents cable deformation
- Provides durable loop eye

Material

Galvanized Steel

Common Applications

Rigging, Load-bearing, Cable Assemblies
