

Wire Spool Winding Machine with Band Saw

This machinery combines a wire spool winding machine and a band saw. The wire spool winding machine efficiently spools cable, and the band saw cuts various materials.

Product Overview

Integrated Wire Processing and Cutting Solution

This industrial-grade machinery combines a wire spool winding system with a vertical band saw, offering a versatile solution for construction and manufacturing workflows. The wire spool unit is engineered for efficient material handling, featuring a sturdy frame and integrated motor control. Complementing the winding system, the vertical band saw provides precise cutting capabilities for various materials, making this a comprehensive station for material preparation and processing.

Machine Configuration

Included Components

- Wire Spool Winding Machine
- Vertical Band Saw

Design Features

Industrial Grade, Integrated Control Panel, Dual Spool System, Vertical Cutting Blade

Performance Metrics

Performance Highlights

2 units
