

Wire Termination Impact Punch Down Tool Set

Specialized impact and punch down tools are designed for terminating wires into terminal blocks and patch panels. They facilitate the insertion and cutting of wires in a single operation, ensuring secure and reliable connections.

Overview

Professional Wire Termination Solutions

This comprehensive set of impact and punch down tools is engineered for precision wire termination into terminal blocks, patch panels, and circuit boards. Designed to facilitate the insertion and cutting of wires in a single operation, these tools ensure secure and reliable connections for telecommunications and networking infrastructure. The kit includes specialized models compatible with a wide range of systems, including CAT 5E modules, Krone-type connectors, and Panasonic & 110-type systems.

Key Features

Core Functionality

- Single-operation wire insertion and cutting
- Secure terminal block seating
- Versatile modular jack compatibility
- Reliable circuit board connectivity

Compatible Systems

CAT 5E Modules, Krone Type, Panasonic Type, 110 Type, 630A Modular Phone Jack, Northern Telecom Terminal Blocks, IBDN Patch Panels

Technical Specifications

Tool Specifications Table

Model	Length (mm)	Weight (kg)
HT-3240	188	0.3
HT-118	114	0.3
HT-318M	170	0.16
General Model A	155	0.16
General Model B	144.5	0.16
Stripping Tool	94	0.16
