

Wired Computer Headset with In-Line Microphone

This wired stereo headset is designed for computers and other devices. It features an adjustable headband, in-line microphone, volume control, and a standard 3.5mm audio jack.

Product Overview

Professional Communication Solution

This lightweight stereo computer headset is engineered for comfortable, extended use in professional environments. It features an adjustable headband and padded earcups for ergonomic support, alongside an adjustable in-line microphone for clear, reliable communication. With its standard 3.5mm connectivity and durable, tangle-resistant cabling, it offers a seamless plug-and-play experience for laptops, computers, and mobile devices.
