

Wired Dynamic Microphone for Vocals and Instruments

This wired dynamic microphone is designed for vocal and instrument applications. Its features include rugged metal construction, an on/off switch, and a dynamic capsule for clear, reliable sound reproduction.

Product Overview

Professional Dynamic Microphone

This wired dynamic microphone is engineered for reliable performance in both vocal and instrument applications. Constructed with a rugged metal body, it is designed to withstand the demands of live performances, public speaking, and recording sessions. Its unidirectional polar pattern ensures focused sound capture while minimizing background noise for clear audio reproduction.

Technical Specifications

Capsule Type	Dynamic
Polar Pattern	Uni-directional
Frequency Response	50Hz - 15KHz
Output Impedance	600 Ω
Sensitivity	-75 \pm 3dB

Physical Characteristics

Body Material	Metal
Key Features	On/Off Switch, Wired, Rugged Construction
