

Wired Dynamic Microphone for Vocals and Speech

This wired microphone is designed for vocal and speech applications. It features a dynamic capsule for clear sound reproduction and includes an On/Off switch for easy control.

Product Overview

Versatile Dynamic Microphone

The PT-727A is a high-quality wired dynamic microphone engineered for professional vocal and speech applications. Featuring a hyper-cardioid pickup pattern, it effectively captures focused sound while minimizing background noise. This durable unit is an excellent choice for public speaking, karaoke, and recording needs.
