

Wired Dynamic Vocal Microphone

This microphone features a zinc alloy body for durability and a smooth surface. It has a magnetic reed mute switch and a twin-cord shielded wire to resist interference.

Product Overview

Professional Vocal Performance

The PT-788 is a professional-grade dynamic wired microphone engineered for vocal and speech applications. Featuring a robust zinc alloy body with a high-quality spray painting finish, it ensures durability for frequent use in live settings. The uni-directional polar pattern effectively isolates sound and minimizes feedback, making it an excellent choice for stage performances, studio recording, and public address systems.

Technical Specifications

Frequency Response	50-14000Hz
Sensitivity	-74 dB
Impedance	600 ©

Design & Build

Material	Zinc alloy with spray painting finish
Microphone Type	Dynamic, Uni-directional
