

Wired In-Ear Headphones with Translucent Housing

These in-ear headphones feature a translucent blue housing with clearly marked left and right earbuds. They provide a wired connection for dependable audio transmission.

Product Overview

Professional Wired Audio Solution

These in-ear headphones feature a distinctive translucent blue housing, combining a modern aesthetic with functional design. Designed for clear audio reproduction, they include intuitive L and R channel markings for easy identification. The durable white cable and comfortable ear tips make them an ideal choice for reliable, everyday wired listening.
