

Wireless 300Mbps Router

This wireless router is designed for home or small office use. It supports IEEE 802.11b/g/n standards, providing data transfer rates of up to 300Mbps.

Overview

High-Performance Wireless Connectivity

This wireless router is designed to deliver reliable connectivity for home and small office environments. Supporting IEEE 802.11b/g/n standards, it provides data transfer rates of up to 300Mbps, ensuring smooth performance for streaming, online gaming, and general internet access. The device features dual antennas for enhanced coverage and includes a suite of advanced security protocols to keep your network protected.

Technical Specifications

Wireless Standards	IEEE 802.11b, IEEE 802.11g, IEEE 802.11n
Max Data Transfer Rate	300 Mbps
Antenna Setup	Dual antenna system for enhanced coverage

Security & Management

Security Protocols

WPA • WPA2 • Firewall Protection

Management Features

- Web-based configuration interface
- Network activity monitoring
- Parental controls

Connectivity

Connectivity	Multiple Ethernet ports for wired connections
