Product Overview

Professional Wireless Weather Station

This atomic wireless weather station provides precise environmental monitoring with a high-contrast color display. Designed for both home and office utility, it integrates barometric pressure tracking, weather forecasting, and dual-sensor support for indoor and outdoor conditions. The inclusion of a dedicated USB charging port adds practical value, allowing users to power mobile devices directly from the station.

Technical Specifications

Performance Metrics

300 ft

Transmission Range

5 V

DC Adapter Power

Temperature Sensing Range

Location	Range (°C)	Range (°F)
Indoor	0 to 50	32 to 122
Outdoor	-4 to 60	-40 to 140

Hygrometer Range

20% - 95% (Indoor & Outdoor)

Physical Attributes

Unit Dimensions (mm)

- Display: 205 x 130 x 30
- LCD Viewing Area: 92.5 x 166.5
- Sensor: 92 x 40 x 23

Features

Key Functionality

Atomic Time Signal, USB Charging Port, Barometric Pressure Trend, Dual Alarm Clock, Min/Max Memory, LED Backlight
