

Wireless Bluetooth Laser 1D Barcode Scanner

This is a wireless Bluetooth laser barcode scanner for efficient data capture. The scanner features an ergonomic design and connects via Bluetooth for flexible use.

Product Overview

Professional Laser Scanning Performance

The XL9028 is a professional-grade wireless barcode scanner engineered for high-efficiency data capture in fast-paced environments. Utilizing precision laser technology, it provides reliable and rapid reading of 1D barcodes across diverse sectors such as retail, logistics, and warehousing. Its ergonomic, durable design ensures user comfort during extended shifts, while Bluetooth connectivity enhances workflow flexibility by eliminating restrictive cabling.

Technical Specifications

Scanning Technology	Laser
Supported Barcode Types	1D

Connectivity

Connection Interface	Bluetooth
----------------------	-----------

Design and Build

Design Aesthetic
Yellow and Gray

Key Hardware Features

- Ergonomic handle design
- Large primary scan button
- Integrated function control buttons

Applications

Typical Industry Applications

- Retail
- Warehousing
- Logistics
