

Wireless Door Chime System

This wireless door chime system offers simple installation and operation. It is designed to provide an audible alert in residential or commercial environments when visitors arrive.

Product Overview

Modern Wireless Chime Solution

The wireless door chime system offers a flexible approach to visitor notification by allowing users to select their favorite MP3 files as custom ringtones. Designed for convenience, the receiver includes a high-capacity 1200mA lithium battery and a dedicated charger, eliminating the need for frequent battery replacements. This system is ideal for residential or commercial use where reliability and ease of customization are prioritized.
