

# Wireless Dual-Channel Microphone System

This wireless microphone system has true diversity and sync IR for stable signal transmission. It features 200 channels for flexible frequency selection.

## Product Overview

### Professional Dual-Channel UHF System

This wireless microphone system features advanced PLL technology and UHF high-band frequency transmission to ensure reliable, interference-free audio. With 200 adjustable channels and automatic IR synchronization, the setup process is both simple and efficient for professional use. Housed in high-strength alloy, the transmitters and receiver are built for durability in diverse performance and public speaking environments.

## Technical Specifications

Frequency Range	620-950MHz
Total Channels	200
Working Distance	60 m
AF Response	65Hz-15KHz ( $\pm 3$ dB)
Total Harmonic Distortion	0.3 %

## Power and Compatibility

Battery Requirements	2 x AA 1.5V
Estimated Battery Life	10 hours
Power Supply	AC 100-240V, 50/60Hz

## Performance Metrics

### System Performance

<b>100 dB</b> Dynamic Range	<b>98 dB</b> S/N Ratio	<b>45 KHz</b> Max Deviation
--------------------------------	---------------------------	--------------------------------

## Features

Key Capabilities	IR Frequency Sync, PLL Technology, LCD Display, High-Strength Alloy Body, Independent Balance Output
