Product Overview

Professional Wireless Audio Performance

This wireless handheld microphone system is designed for high-clarity vocal transmission, making it ideal for professional presentations, karaoke, and public speaking. Featuring a robust dynamic microphone capsule and a stable UHF transmission range, the system ensures reliable performance with minimal interference. The built-in LCD display allows for real-time monitoring of channel selection and operational status, while the versatile connectivity options ensure compatibility with most mixers and amplifiers.

Technical Specifications

Frequency Range	220-270 MHz
RF Power	25 mW
Bandwidth	76 MHz
Frequency Stability	10PPM (-10~50)
Harmonic Suppression	65 dB

Operational Details

Oscillation Mode	PLL
Adjustment Method	FM
Maximum Modulation	75 K

Power and Electrical

Operating Voltage	9V*2
Working Current	110 mA

System Features

System Capabilities

LCD Display, UHF Transmission, Dynamic Capsule, Balanced XLR Output, Unbalanced 1/4" Output
