

Wireless Home Security Alarm System

This wireless alarm system includes a WiFi hub, PIR motion sensor, door chime, and SOS button. It connects to the internet via WiFi, providing remote monitoring and smartphone alerts for door openings, motion detection, and emergencies.

System Overview

Comprehensive Home Security

The RL-WIFI10 wireless alarm system serves as a central hub to protect your home with ease. By connecting up to 50 individual accessories, such as PIR motion sensors and magnetic door/window detectors, it provides reliable real-time monitoring. Upon triggering a sensor, the gateway instantly relays data to the cloud, ensuring you receive immediate push notifications directly on your mobile device.
