

Wireless IP Camera with Alarm System

This wireless IP camera features integrated alarm system components. It includes a motion sensor, door/window sensor, SOS wrist button, and IP camera for comprehensive security monitoring and emergency response.

Product Overview

Integrated Security Solution

The RL-IPCA01 is a comprehensive wireless security system that combines high-definition IP camera monitoring with an integrated alarm suite. Designed for versatility, the system supports up to 28 wireless accessories, including motion sensors, magnetic door sensors, and emergency buttons. Users can manage security status, receive real-time photo alerts, and control camera angles directly via their mobile devices.
