

# Wireless Motion Sensor Alarm with Remote Control

This wireless alarm system features motion-sensing technology and a loud >100dB alarm. It includes remote controls for operation and is designed to be wire-free for easy installation.

## Product Overview

### Wireless Security Solution

The Wireless Motion Sensor Alarm with Remote Control is a versatile security system designed for easy installation and effective monitoring. Utilizing advanced infrared motion-sensing technology, it provides both audible and visual alerts to deter intruders. With its wire-free design and remote control operation, this unit offers a convenient and energy-efficient solution for various security applications.

## Key Features

### Core Features

- Motion-activated alarm with flashing light
- Wireless operation for easy installation
- Remote control included
- Low power consumption design
- Interference avoidance via learning code technology

## Performance Metrics

### Alarm Volume

**100 dB**

Sound Intensity

<b>Sensor Technology</b>	Infrared Motion Sensing
<b>System Capabilities</b>	Motion-Sensing, Contact Sensor, Wire-Free, Audible Alert, Visual Alert

## Operation

<b>Installation</b>	Wire-free / Easy Installation
<b>Control Method</b>	Remote Control
