

Wireless Network Router

This router complies with IEEE 802.11g/b, 802.3, and 802.3u standards. It shares data and Internet access for multiple users, supporting various connection types including PPPoE, Dynamic IP, and Static IP.

Product Overview

High-Performance Wireless Connectivity

This wireless router is engineered to deliver reliable 300Mbps internet speeds for small office and home environments. Its versatile design supports both wireless and wired connectivity, ensuring seamless integration with various professional devices. With a compact form factor and clear status indicators, it provides a user-friendly networking solution that is easy to deploy in any workspace.

Technical Specifications

Wireless Speed

300 Mbps

Data Transfer Rate

Connectivity Ports

- 1 WAN port
- 4 LAN ports

Antenna Configuration

Detachable antenna for enhanced signal coverage

System Indicators

Status Indicators

SYS, WLAN, WAN, LAN 1, LAN 2, LAN 3, LAN 4
